“KublaCon has been such a wonderful partner for our past Kickstarter events, and I am excited about bringing the fairy world of Amy Brown to one of the best game conventions around! In the past we have brought Orcs, a Lich King and Roman Generals to the main lobby, this time the beautiful Fae will ply their magic to trick the King of Cons and steal the show.”

-Brandon Raasch, Founder, BARD Games.

Fickle began as a game concept by Glenn Cotter where players secretly trick their opponents into playing cards. As the game matured the focus shifted to include unique press your luck control of opponent's cards and customizable play style by choosing which fairies to use in your game. This game project peaked when we partnered with Amy Brown's fairy world to bring her fans a game that celebrates her amazing fairies.

“BARD Games is very excited to launch our 2019 year with Fickle. I believe this project embodies what our brand sets out to do; connecting the game community with unique brands to produce fun games with exciting themes for our customers.”
